About ANYAL

Anyal is a private Software Development Company operating in Sudanese market since 2003.

It is specialized in software, mobile applications and website development, maintenance and publication as well as software services, such as training, documentation, and consulting.

We are committed to deliver very high quality services equipped with latest techniques and furnished with current market strategies, focusing entirely on customer requirements.

Anyal solves challenging technical problems in partnership with our clients.

We achieve this by understanding the business requirements of our clients, and how to use technology as a tool to make modern businesses easier, consistent and profitable.

We believe that a great customer service is our real challenge and this will make the difference.

We value collaboration; ideas are shared and everybody contributes on an individual basis to the common goal to deliver high quality solutions.
